

## A BRIGHT LIGHT IN THE DARKNESS

**Imagine this: A disaster strikes, destroying your home and taking away everything you own. You run from the devastation and find yourself living in a temporary shelter, in an overcrowded area, with no electricity.**

When night falls, you stay inside and make sure all your children are nearby and kept safe.

This is often the reality for many families that have lost their homes to disaster.

Our solar lights give families the ability to do basic things, such as cook, clean, wash, work and even study after dark. The glow of this small solar lamp helps families to rebuild a sense of normality, and provides safety after darkness falls. They are a beacon of hope for families caught in the chaos of disaster.

## SOLAR LIGHTS

[www.shelterbox.org.nz/solar-lights/](http://www.shelterbox.org.nz/solar-lights/)

**Our aid packages may also include:**

**Water filters**  
so families can access safe drinking water

**Mosquito nets:**  
to reduce the risk of dangerous disease & help families sleep better at night

**Blankets:**  
so families can stay warm and comfortable

**Tents:**  
so families can have a place to call home, where they can be protected from the elements

- Our solar lights can last up to 24-hours on just one charge.
- They are waterproof, inflatable, lightweight and can float. They have 3 brightness settings.
- A donation of just \$30 will allow us to provide a family with a solar light.
