

A PLACE TO CALL HOME AND STAY PROTECTED FROM THE ELEMENTS

When disaster strikes, families need shelter and protection. They need somewhere to stay safe and secure, where they can begin the long journey of recovery.

Families who have lost their homes in disaster, or those who are forced to flee violent conflict, deserve the best possible emergency shelter support available.

More than just canvas and pegs, our durable tents have the power to transform lives. They provide families with a place to call home, where they can come together, rest after a long day, and find a sense of normality.

Designed to withstand extreme weather, our tents can keep families warm during the freezing winter months, and cool in even the hottest climates.

Our aid packages may also include:

Solar lights: so families can maintain routine & stay safe after night falls

Water filters so families can access safe drinking water

Mosquito nets: to reduce the risk of dangerous disease & help families sleep better at night

Blankets: so families can stay warm and comfortable

- Our tents are tested in winds up to 100kmh where, even without guy ropes, they remain sturdy.
- A donation of \$500 will allow us to provide a family with a tent.
